**FERC Standards of Conduct – Order 2004, Order 717
AES Indiana Shared Facilities**

The Transmission Operations offices and the AES Indiana Merchant offices are located in different facilities.

The two operations do share the AES Indiana Energy Management System. Transmission information is restricted from the Merchant operations through password protection, access rights down to the data level, and with firewalls.

Merchant operations personnel are not permitted to enter the Transmission Operations area. Access to the Transmission Operations area is controlled by locks and key card access.
